

Group 1

Are our models enough?

- All rely on Good Data and enough of it
- Different approaches have different objectives
- What are you asking?
- SITE specific and RISK specific

Group 1

Where are the current gaps?

- We have the tools but...
- How to upscale the pore scale to the field
- Gaps in the data eg rock water CO₂ interactions over long term
- Lack of clear/consistent METHOD
- Lack of SHARING results/skills
